Database Management Systems L10

Umass Boston
Summer 2023
Cristina Maier

JAVA

- ❖ JDBC

  - ❖ Stands for Java DataBase Connectivity API

- ❖ JDBC Driver

Java Code Sample

- P1.java

- P2.java

- P3.java

Running Instructions (on UNIX machine)

export CLASSPATH=/home/yourPath/ojdbc11.jar
(where /home/yourPath is replaced by the full path of the directory where you copied ojdbc11.jar)

cd <folderWith .java code>
(to go to the folder where your java code is)

To compile a java file P1.java:

javac P1.java

To run the file (it needs to be previously compiled):

java P1.java

Java Code

- ❖ Look at the code

- ❖ Practice with running java files
